

Ingredients (2 fl oz): Purified Ionized water, Sodium Chloride 17.6 mcg per serving, Stabilized Oxygen molecules.

Suggested Use: Mix 20 drops of OxyQuest in 8 oz. of fluid 3 times per day and drink.

Do not use directly on skin. Keep out of reach of children.

Testing has indicated OxyQuest to be classified as "non-toxic", even at 25 times the suggested dosage. The ingredients used are food grade ingredients. OxyQuest has a history of over 30 years with no contra-indications and no toxic side effects.

OxyQuest is proving itself as one of the most remarkable products of this decade. This is reasonable to accept, as we gain an appreciation of the attributes of oxygen.

I have seen the benefits OxyQuest provides, from increasing energy to what many people would consider miracles.

For prevention and regeneration, as a Naturopathic and Nutritional doctor, I would recommend OxyQuest to anyone.

R. Widmer, ND, NC

OxyQuest, with Stabilized Oxygen Molecules, is the most powerful, dynamic immune boosting, bacteria destroying, circulation enhancing supplement available on the market today.

We are surrounded by air; therefore it is easy for us to take this precious element and its unending supply for granted. However, if the supply of oxygen were cut off, we would die in a matter of minutes. Studies have shown that the amount of oxygen in the air that we breathe has decreased by as much as 50% compared to the days of our ancestors. The four modern-day stressors—toxic stress, emotional stress, physical trauma, and infections—increase the body's acidic level further depleting the body's oxygen supply.

Our modern lifestyle has taken a heavy toll on our body's oxygen content, and many people suffer from oxygen starvation without knowing it. We refer to this as "cell suffocation," a condition that is killing us gradually.

Cell suffocation kills silently

Dr. Steven Levine, a respected researcher in nutrition, has stated that oxygen deficiency is the single greatest cause of all diseases. In addition, Dr. Otto Warburg, two-time winner of the Nobel Prize for medicine, reported that the prime cause of cancer is lack of oxygen in the cells. Dr. Warburg proved that the growth of cancer is inhibited in a high-oxygen environment. His Nobel laureate lecture showed that when oxidation fails and fermentation is substituted for a cell's energy, the pathway to cancer is opened. Many scientists are now examining the role oxygen starvation plays in the development of diseases.

Oxygen therapy

Oxygen is a healer, a cleanser, and a source of energy to every cell in our body. It strengthens immune systems, destroys bacteria and viruses, and provides numerous life giving benefits. The difficulty has been to harness oxygen's tremendous benefits in a form that would be stable and non-toxic. Until the formulation of OxyQuest!

What consumers say about OxyQuest:

HEART

My husband had a very poor heart and could not seem to get enough air. He began taking the OxyQuest and you could even see his color improve as well as his breathing. It sure has been a great help to us. K.F., AB

HIGH BLOOD PRESSURE

I have had high blood pressure, 180 over 110. Someone had told me that had helped their blood pressure so I started taking some 20 drops 3 times a day. After 3 months my blood pressure is back to normal. My doctor and I were very pleased. It has also given me energy I never knew I had before. It has made me come alive again. It is just great! E.M., SK

ECZEMA

I started taking OxyQuest in the middle of July, 1987. I noticed right away that my eczema cleared up to a point where I could barely notice. My asthma became much better, I also cut down on the medicine prescribed by my doctor. The allergies that I have, which get considerably worse as the summer goes on, were almost cleared up, thanks to OxyQuest. C.T., BC

BLADDER INFECTION & CANDIDA

At the first sign of candida, a Nashville, Tennessee woman began taking. Within three weeks of taking 20 drops, three times a day, in a glass of water, all the symptoms disappeared and have not returned. She also uses the same dosage of whenever she suffers bladder infections. She reports, within 24 hours of taking the product all symptoms disappear.

Typical conditions and symptoms of oxygen starvation include:

- ◆ Poor Immune System
- ◆ Allergies
- ◆ Yeast Infection
- ◆ Aggravates Chronic Disease
- ◆ Depression
- ◆ Pale Looking
- ◆ Digestive Disorders
- ◆ Dizziness
- ◆ Sluggish Movements
- ◆ Poor Vitality & Mental Alertness
- ◆ Poor Stamina
- ◆ Cold Hands and Feet
- ◆ Poor Concentration and Memory
- ◆ Poor Appetite
- ◆ Chronic Fatigue
- ◆ Acid Stomach
- ◆ Respiratory Problems
- ◆ Poor Circulation

How to Use OxyQuest

Easy to use—it has a specially designed dropper.

OxyQuest must be diluted and taken orally with one 8oz. Glass of water, juice or milk. It can also be used as a disinfectant.

Health maintenance for adults: 20 drops in one (8 oz.) glass of water, 3 times daily.

Athletic training: 20–30 drops in one glass of water, 3 times daily.

Children, below 5 years: 1 to 3 drops in one glass of water.

5 to 10 years: 3 to 8 drops in one glass of water.

10 to 16 years: 8 to 10 drops in one glass of water.

Tooth decay and gum infection: 2 to 3 drops on toothbrush.

Mouthwash: 10 drops 3 times a day with water (Gargle for 60 seconds or more).

Purification of drinking water: 20 drops per gallon (4 litres)/5 drops per 8 oz. glass of water.

Most people can tolerate a dosage of 20 drops in an 8 oz. glass of water 3 times daily. However, if you experience any adverse symptoms (known as a healing reaction), reduce the dosage. Those who experience a healing reaction are often those with a long history of poor eating habits, lack of exercise and/or the long term use of prescription drugs. The amount of sodium chloride is negligible and should not pose any risk to people on low sodium diets.

It is important to continue taking OxyQuest to maintain optimum health.

OxyQuest can be added to most liquids. However, it is not advisable to add to boiling liquids as this breaks the bond and de-stabilizes the oxygen. Keep away from prolonged periods of direct sunlight and store at a temperature of less than 130° Fahrenheit.

OxyQuest is strongly alkaline; it is not advisable to apply directly onto the skin. It can be used in diluted form for stings, bites and burns due to its antiseptic properties.

A constant and adequate supply of oxygen promotes a healthy immune system. You will be amazed with the benefits produced by these little drops of oxygen. So, start giving your cells *the breath of life*.

Quotes from health practitioners:

Dr. Paris Kidd

Oxygen plays a pivotal role in the proper functioning of the immune system, i.e., resistance to disease, bacteria and viruses...

Dr. Freibott

Oxygen is a powerful detoxifier. When its quantity is deficient, toxins begin to devastate body functions and deplete the body of life giving energy.

Dr. Steven Levine

We can look at oxygen deficiency as the single greatest cause of disease.

What is OxyQuest?

OxyQuest is alkaline in nature and contains only negatively charged electrolytes of oxygen. This makes it different from any other oxygen product on the market. The genius of the formula lies in using two of the most abundant and important electrolytes in body fluids—sodium and chloride—to act as oxygen carriers. The molecular oxygen is released through the digestive process and absorbed into the bloodstream.

The oxygen we breathe contains both positive and negative molecules. The negative or alkaline molecules are the beneficial portions of oxygen. The positive or acidic molecules are of little value and create free radical activity within the body.

OxyQuest is STABLE (it will not dissipate over time), it is highly ALKALINE, (composed of negative ions which reduce free radical damage), and is so SAFE that it can be diluted and used for gum diseases and chronic infections.

Benefits of Oxygen Supplementation

Increased Energy: When Oxygen is ingested, it helps in the oxidative process and enhances the utilization of nutrients, thereby providing more energy. When the energy level rises, mental alertness and concentration also improve.

Increase Respiratory Efficiency: OxyQuest helps provide oxygen for cellular respiration so weak lungs and constricted bronchial passages are not the only means of getting oxygen to the body.

Improve Blood Circulation: Once OxyQuest is ingested, the oxygen may be absorbed into the blood helping to improve circulation. This is especially beneficial to those who spend long hours in air-conditioned offices and who suffer from cold hands and feet.

Enhanced Immune Function: Oxygen has been shown to boost the white blood cells that make up our immune system, thereby helping in the prevention of diseases. For example, the growth of cancerous cells can be restricted in the presence of oxygen.

Reduce Free Radicals: OxyQuest is stabilized oxygen. By limiting free radical activity that damages body cells, it slows down the aging process.

Kill Infectious Bacteria and Fungus: Oxygen kills anaerobic bacteria without the side effects of antibiotics. It is therefore effective against candidiasis, sore throats, ulcers and kidney infections, to name a few.

Eliminate Toxins: Oxygen aids in removing cellular waste from the body. By limiting free radical activity that damages body cells, oxygen enhances the complexion and slows down the aging process.

Improve Mental Health: Oxygen improves concentration and alertness, enhancing clarity and a heightened sense of well-being.

Prevent Tooth Decay and Gum Disease: Oxygen has been used successfully by many dentists to control gum disease and tooth decay.
