My Story about overcoming Leukemia with ImmunoCal and Extra Sharp:

My name is Joseph Neil, I will be sixty (63) years old on August 05, 2009. Within the last six and a half year period, my health had been continually going down hill, to the point that I made an appointment to go to the VA Clinic, in Cumberland, MD for a check-up on April 27, 2006. I went for a complete physical checkup as scheduled and then submitted blood, stool samples, a urine sample and received a chest X-ray.

The VA Clinic had me take Two (2) additional Blood Tests, one on May 5, 2006 and one, thirty days later, on June 05, 2006.

On June 06, 2006, I received a call from a Dr John Gee of the Cumberland VA Clinic. Dr. Gee said that the results of my blood test indicated that my White Count and Platelets were unusually high and that the lab work reflected that that I had a malignant neoplastic disease known as Leukemia. Dr. Gee said that he wanted to schedule me for additional Hematology testing at the Martinsburg WV, VA Medical Center. Dr. Gee explained to me that I had a malignant neoplastic disease in which the bone marrow makes too many white blood cells. A malignant neoplastic disease is a blood and bone marrow disease that usually gets worse, until death occurs.

The average White Count is 5,000 to 10,000 per cubic millimeter. The average Platelets Count is 150,000 to 300,000 per cubic millimeter.

On June 5, 2006: My White Count was 14,200 per cubic millimeter and my Platelets Count was 560,000 per cubic millimeter.

My other symptoms were typical for a malignant neoplastic disease. I had Fevers and night sweats, Continuous weakness and fatigue, Daily Headaches, Bleeding from the gums (lost all of my teeth in my lower jaw and only eleven teeth in my upper jaw remain). I had Joint pain throughout my body, Swelling and pain in the left shoulder and lymph nodes in my neck. I also had Swelling in my belly.

During the next few years, the Dr at the VA Clinic in Cumberland

scheduled additional tests to find out how far the malignant neoplastic disease was spreading; including In-Depth Hematology Testing, a MRI and a CT-Scan at the Martinsburg WV, VA Medical Center.

Julie Zeger, PA-C of the Hematology Clinic told me that my prognosis was bleak and that the Clinic wanted to continue monitoring my condition and that if it got worse, they recommended that I get complete Blood Transfusions, where they would take my blood, filter out the deadly toxins, and then put the blood back into my body.

Mrs. Zeger said that if the Blood Transfusions did not show any improvement to my condition, as a last resort, they would recommend that I submit to Chemo and Radiation treatments. I told Mrs. Zeger that I would consent to having my condition monitored; however, I would NOT consent to the Blood Transfusions, the Chemo or Radiation treatments, at that time. About five or six months ago, one of my closest friends for over thirty (30) years from California, Doyle King, knowing about my physical condition and my fight with Leukemia decided to send me some Immunocal Platinum and some Extra Sharp, if I agreed to faithfully take them, as directed.

Well, yesterday, August 3, 2009, I took a complete battery of tests at the VA Hematology Clinic in Martinsburg WV, VA Medical Center. The results of the tests were astounding. All of my blood readings were in the normal ranges. Mrs. Zeger asked me if I was taking anything different from my normal regime of Vitamins. I told Mrs. Zeger about Immunocal Platinum and Extra Sharp and showed her some company documentation about the products. Mrs. Zeger asked me how long ago it was since I took my last Blood Transfusion. I reminded her that I had refused Blood Transfusions and she had to check with her computer to refresh her memory.

Due the results of my latest tests, My Leukemia is now considered to be officially in remission and I am not scheduled for any additional tests until next year at this time. I have no symptoms relating to Leukemia and I feel fine. I'm a firm believer in Immunocal and Extra Sharp and will continue to have these fine products 'auto-shipped' to me monthly.
